Projects Details

1. Learning Management System (LMS)

Learning Management System (LMS) project using the MERN stack - MongoDB, Express.js, React.js, and Node.js. Integrating advanced technologies for a seamless and intuitive platform for educational purposes. Leveraging React.js for dynamic frontend interface and Node.js/Express.js for efficient data management.

2. Music Art Application

    I developed a Music Art application UI using Next.js, Tailwind CSS, and AcertinityUI. The interface is intuitive, responsive, and visually appealing, allowing users to explore music and album art seamlessly, with a strong focus on accessibility and performance across devices.
